Whether cases are simple or complex,
the standard of care should be anything but standard.

The Hot AXIOS Stent and Electrocautery Enhanced Delivery System provides a simpler and faster treatment option for patients, we can now provide an endoscopic solution that provides relief for these patients using one device in a single setting.

— Kenneth Binmoeller, M.D.
California Pacific Medical Center, San Francisco, CA
and the inventor of the AXIOS System.

Because today's barriers are
tomorrow's breakthroughs.

Enabling an Endoscopic Solution

The Hot AXIOS™ Stent and Electrocautery Enhanced Delivery System

was the first stent indicated for transgastric or transduodenal endoscopic drainage of symptomatic pancreatic pseudocyst and walled off necrosis or the biliary tract under EUS imaging guidance. The cautery-enhanced access and delivery catheter is advanced through the tissue creating a transluminal conduit between the stomach or duodenal wall and the pancreatic pseudocyst where the pre-loaded stent is deployed to provide drainage.

Stent Design

AXIOS Stent (front and side views)

- Proprietary one-step combined diathermic ring and cut-wire provides access into target tissue
- MRI conditional, fully covered self-expanding metal stent pre-loaded in the delivery catheter
- Perpendicular flanges secure tissue layers and help prevent migration
- Three sizes available, with the largest featuring a 20 mm lumen for drainage
- Large diameter lumen apposition stent enables drainage allowing passage of the endoscope through the stent for additional therapeutic procedures including cystoscopy, irrigation and debridement

Potential Clinical Benefits

Previous available technologies for endoscopic management of pancreatic pseudocysts were not originally designed or intended for this type of treatment.

Images provided by Dr. Adler.

The 20 mm AXIOS Stent size was ideal for my patient with a large PFC/WON as it allowed rapid drainage of solid and liquid contents and will greatly facilitate endoscopic necrosectomy going forward.

— Douglas G Adler MD, FACP, AGAF, FASGE
University of Utah School of Medicine,
Huntsman Cancer Center, Salt Lake City, Utah, U.S.A.

AXIOS™ Stent System

The **AXIOS Stent and Electrocautery Enhanced Delivery System** is available in the following stent configurations. Each AXIOS Stent comes pre-loaded into the AXIOS Delivery System.

Product Code	Description	Flange Diameter (mm)	Lumen Diameter (mm)	Saddle Length (mm)	Catheter OD (Fr)	Catheter Working Length (cm)	Catheter Total Length (cm)
M005 53520	1 AXIOS System with 6 x 8 Stent	14	6	8	9	138	144
M005 53530	1 AXIOS System with 8 x 8 Stent	17	8	8	9	138	144
M005 53540	1 AXIOS System with 10 x 10 Stent	21	10	10	10.8	138	144
M005 53550	1 AXIOS System with 15 x 10 Stent	24	15	10	10.8	138	144
M005 53560	1 AXIOS System with 20 x 10 Stent	29	20	10	10.8	138	144
